AMENDMENTS TO THE ABSTRACT:

Please amend the Abstract as follows:

In a game system in which two game spaces are separately displayed on first display means and second display means, first display control means ~~which~~ that causes a first game space to be displayed on the first display means, and second display control means ~~which~~ that causes a second game space which is different from the first game space to be displayed on the second display means are provided. Based on a virtual positional relationship between the first game space and the second game space, the second display control means causes a related image of an object located in the first game space to be displayed on the second display means.
